Createspace Independent Publishing Platform, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.There is something that travels faster than light and this has been known about for decades. In the year 1725 an observation was made that disproved the later claimed principle of invariance which is where or why the name Relativity comes about and is thus the foundation stone or fulcrum point of the theory of relativity put forward by Albert Einstein some 180 years later, and thus totally destroys Einstein s theories of relativity before they are even written and proffered up. In the year 1913 an experiment was conducted that proves beyond doubt, (it is today a very well established fact and commercially used effect) that light is NOT a constant, and that light can travel faster than C to an exceedingly close frame of reference and also slower than C to a very close frame of reference, contrary to Einstein s theories. Time dilation is shown to be totally false and the supposed mind experiments claimed to prove dilation are exposed and shown to be FLAWED. TIME is given a true, exacting and unambiguous definition as never before. The reason behind why atomic clocks are CLAIMED to show time dilation. Space-time does not and cannot exist! The principle of equivalence is proven to be incorrect. There is a place of zero G, but what about zero inertia; and the effects the link of inertia gravity have on the function of rockets. Because of new information, an explanation to the question of why galaxies spin so fast has been found and with this explanation comes forth a better and more fitting explanation to cosmology other that the big bang theory. E does not, and cannot = MC. Why has the obvious...
