ATLAS OF THE CHILD IN INDIA

Concept Publishing Company (P) Ltd., 1986. Hardcover. Book Condition: New. The study highlights both the quantitative and qualitative aspects of the child population through the presentation of relevant data, its cartographic as well as diagrammatic representation and textual interpretation. The four facets of the child population analysed are demography, work force, literacy as well as education and child health, In addition, family planning, a factor affecting both the quantity and quality of the child population has also been taken up for analysis. The study is largely based on data collected from published and unpublished sources and material generated by other projects related to the child population. Simple statistical and mathematical techniques have been used to process the data and work out the interrelationships among the variables. Printed Pages: 495.
