## **BUILDING THE NETWORK OF THE FUTURE: GETTING SMARTER, FASTER, AND MORE FLEXIBLE WITH A SOFTWARE CENTRIC APPROACH (HARDBACK)**

Taylor Francis Ltd, United Kingdom, 2017. Hardback. Condition: New. Language: English . Brand New Book. From the Foreword: This book lays out much of what we've learned at ATT about SDN and NFV. Some of the smartest network experts in the industry have drawn a map to help you navigate this journey. Their goal isn't to predict the future but to help you design and build a network that will be ready for whatever that future holds. Because if there's one thing the last decade has taught us, it's that network demand will always exceed expectations. This book will help you get ready. -Randall Stephenson, Chairman, CEO, and President of ATT Software is changing the world, and networks too. In this in-depth book, ATT's top networking experts discuss how they're moving software-defined networking from concept to practice, and why it's a business imperative to do this rapidly. -Urs Hoelzle, SVP Cloud Infrastructure, Google Telecom operators face a continuous challenge for more agility to serve their customers with a better customer experience and a lower cost. This book is a very inspiring and vivid testimony of the huge transformation this means, not only for the networks but for the entire companies, and how ATT is leading it. It provides a lot of very deep insights about the technical challenges telecom engineers are facing today. Beyond ATT, I'm sure this book will be extremely helpful to the whole industry. -Alain Maloberti, Group Chief Network Officer, Orange Labs Networks This new book should be read by any organization faced with a future driven by a shift to software. It is a holistic view of how ATT has transformed its core infrastructure from hardware based to largely software based to lower costs and speed innovation. To...
