

## BLAST

By Ian Korf, Mark Yandell, Joseph Bedell

O'Reilly Media, Inc, USA. Paperback. Book Condition: new. BRAND NEW, BLAST, Ian Korf, Mark Yandell, Joseph Bedell, Sequence similarity is a powerful tool for discovering biological function. Just as the ancient Greeks used comparative anatomy to understand the human body and linguists used the Rosetta stone to decipher Egyptian hieroglyphs, today we can use comparative sequence analysis to understand genomes. BLAST (Basic Local Alignment Search Tool), is a sophisticated software package for rapid searching of nucleotide and protein databases. It is one of the most important software packages used in sequence analysis and bioinformatics. Most users of BLAST, however, seldom move beyond the program's default parameters, and never take advantage of its full power. BLAST is the only book completely devoted to this popular suite of tools. It offers biologists, computational biology students, and bioinformatics professionals a clear understanding of BLAST as well as the science it supports. This book shows you how to move beyond the default parameters, get specific answers using BLAST, and how to interpret your results. The book also contains tutorial and reference sections covering NCBI-BLAST and WU-BLAST, background material to help you understand the statistics behind BLAST, Perl scripts to help you prepare your data...

### Reviews

*This composed publication is fantastic. This is certainly for all those who state that there was not a well worth reading through. You will not truly feel monotony at whenever you want of your respective time (that's what catalogs are for regarding when you ask me).*

-- Prof. Mark Ratke Jr.

*It is an remarkable ebook which i have possibly read. It really is packed with wisdom and knowledge its been printed in an extremely easy way which is only after i finished reading through this pdf by which really altered me, alter the way i believe.*

-- Dr. Nikolas Mayer
