By recent discoveries it has been established on the basis of inductive philosophy, and elevated almost to the rank of an exact science. The theory of the floral structure which refers each organ to the principle of the leaf, now enters into almost every department of botany, and gives a new aspect to the whole; revealing more clearly than any other discovery has ever done, the beauty and simplicity of the plan on which Creative Power is exerted in the production of the countless forms of vegetable existence. The present treatise contains, first, the Elements of Botany, according to the latest authorities, written in the form of simple propositions, briefly illustrated, and broken into short paragraphs, with direct reference to the convenience of the learner....
