Stanford University Press, United States, 1996. Paperback. Book Condition: New. New.. 229 x 154 mm. Language: English . Brand New Book. This collection of fifteen essays presents the views of some of the world s most distinguished economists on what is emerging as the central topic of the twenty-first century: long-term economic growth. The contributors, who represent a wide range of specialties within economics, relate their work to a common set of questions, within a common framework. The book is divided into six parts: overviews of economic growth and development; the domestic macroeconomic context in which growth takes place (including stabilization and investment); the international context (including trade and finance); the institutional setting (including liability reforms and financial infrastructure); structural and supportive policies (including technology); and the performance of two key industries (computing and chemical).
